Our Proposal

We understand how hard it is to find the right web development partner and we're glad to know that you have chosen us to work with you on your web development project.

We're a team of professionals and we do our best to satisfy our clients' needs and expectations. Our team consists of web developers and designers with 4+ years of active experience and they are all located in Dhaka.

We have a long list of successful projects with brands located in the US, Europe, and Asia. We understand your regional specifics and we're really excited to be working with you.

If you think that we're the right fit for you and you decide to trust us with your project, just sign the Proposal on the last page and return it to us.

Thank you very much for considering our offer!

Name: Md. Moinul Islam

Position: Project Manager

About Us

We started as a couple of fresh out-of-the-college programmers and managed to build a team that is now one of the most reputable agencies in Dhaka.

We have completed hundreds of projects during the past 4 years. Big and Small. Easy and Complex. Paid and pro bono.

We are never afraid to fail if this will lead us to learn something new and expand our professional and personal horizons.

We believe that communication is crucial for the successful completion of our projects. This is why we listen carefully to our clients and we welcome their feedback on every stage of the web development process.

Our project managers will be available to discuss your questions and suggestions at any time, via phone, email.

Project Scope

The new website we'll build for the **B. JAPAN ENTERPRISE CO. LTD** will allow you to reach a wider audience and will present the value you bring to your clients in a modern and more engaging way. The organic traffic to the website will increase, which should improve your conversion statistics.

We believe, we can bring much more to your project than any other web development agency.

Our Solution

As we specialize in website integrations with PHP and Laravel, we suggest that your website is built with CMS. It's one of the most well-known, highly customising, which will allow you to easily maintain your website and let it grow where your needs lead you.

We suggest that you pick a solid hosting company like (<https://www.hostgator.com/>) so that they can ensure that your website will be able to handle any future traffic increase and that the website will be protected against external attacks.
